

The new Lotus Elise S

*We looked hard for ways to improve the Elise.
Our engineers settled on airconditioning
and electric windows.*

The Lotus Elise S.

At Lotus, design has always been governed by one guiding principle. Refinements can never come at the expense of performance. After looking long and hard at improving the Elise s handling and agility, the only modifications our engineers could agree on were enhancements to driver comfort that wouldn't undermine performance integrity. The result is the newly released Elise S — a sports car that now offers electric windows; central locking; a new road noise reduction system; and an airconditioning system so smart, it automatically disconnects under full throttle — so the car's scintillating acceleration (0-100kph 5.7 sec) is never diluted. To appreciate this truly refined sports car, arrange a test drive. At just \$84,990*, you'll even be comfortable with the price.

*Plus dealer delivery and on-road costs. Driving lights, metallic and pearlescent paint optional. Prices and details correct at time of printing excluding E&O's.
